

2" and 2.5" Lift Systems for 2008 4WD Ford Super Duty

2" lift features either gas or diesel specific replacement coil springs. The 2.5" Level-It series lift is coil spacers. The price conscious customer can run the front lift alone, without caster or track bar length correction, but there are trade-offs... all this is covered in catalog #115, page 37. For caster correction, note that we offer either Caster Brackets or replacement alignment cam bushings; the cam bushings are new offerings from Superlift.

Superide shocks (white color) or Superide SS shocks by Bilstein (silver Zinc color) are offered. A 1.5" rear block kit or 2" add-a-leaves are also available.

Dual steering stabilizer kit with SS series silver Zinc plated cylinders now available for all lifted Super Dutys... part #92730!

2008 Ford Super Duty shown with 2" Lift

Are these products in the current Superlift catalog #115?

Not all; see below.

Make these catalog additions / revisions on page 179,

or print-out the new chart attachment then insert into catalog at page 179:

- In **LIFT HEIGHT & METHOD** chart boxes for 2" and 2.5" lifts, omit WITH CASTER BRACKETS. Caster is corrected by either Caster Brackets or alignment cams, ordered separately, as noted elsewhere on page.
- At bottom of page, add #2570, rear 2" add-a-leaf kit.
- In **STEERING STABILIZERS** chart box, add #92730, dual steering stabilizer kit with SS series silver Zinc plated cylinders.
- In **Torque Max chart box**, applications are incorrect and should read as follows:

TORQUE MAX TRACTION BARS			
FORD			
MODEL	YEAR	DESCRIPTION	PART NUMBER STANDARD
F-250 / 350 SUPER DUTY	2008	EXTENDED, & CREW CAB LONG BED	20520
		EXTENDED CAB SHORT BED	20500
		CREW CAB SHORT BED	20510

Installation Notes:

- Add note #119 (listed on catalog page 178).
- Add new note #154: Most Super Duty vehicles have a 1.91" tall factory block (measured at block's rear facing end) and do NOT have top-mounted overload springs; block kit #9016 fits these vehicles. If equipped with 1.91" factory block AND top-mount overloads OR 3.71" factory block WITHOUT top-mount overloads: order either a block kit # 9116, or set of longer U-bolts (qty. one #11654). If equipped with 3.71" factory block AND top-mount overloads: order either block kit # 9117, or set of longer U-bolts (qty. one #11664).

NOTES:
 119. Dually applications require different U-bolts. Measure stock U-bolts and refer to U-bolt specification chart to order correct U-bolts.
 154. Most Super Duty vehicles have a 1.91" tall factory block (measured at block's rear facing end) and do NOT have top-mounted overload springs; block kit #9016 fits these vehicles. If equipped with 1.91" factory block AND top-mount overloads, OR 3.71" factory block WITHOUT top-mount overloads; order either a block kit # 9116, or set of longer U-bolts (qty. one #11654). If equipped with 3.71" factory block AND top-mount overloads; order either block kit # 9117, or set of longer U-bolts (qty. one #11664).
